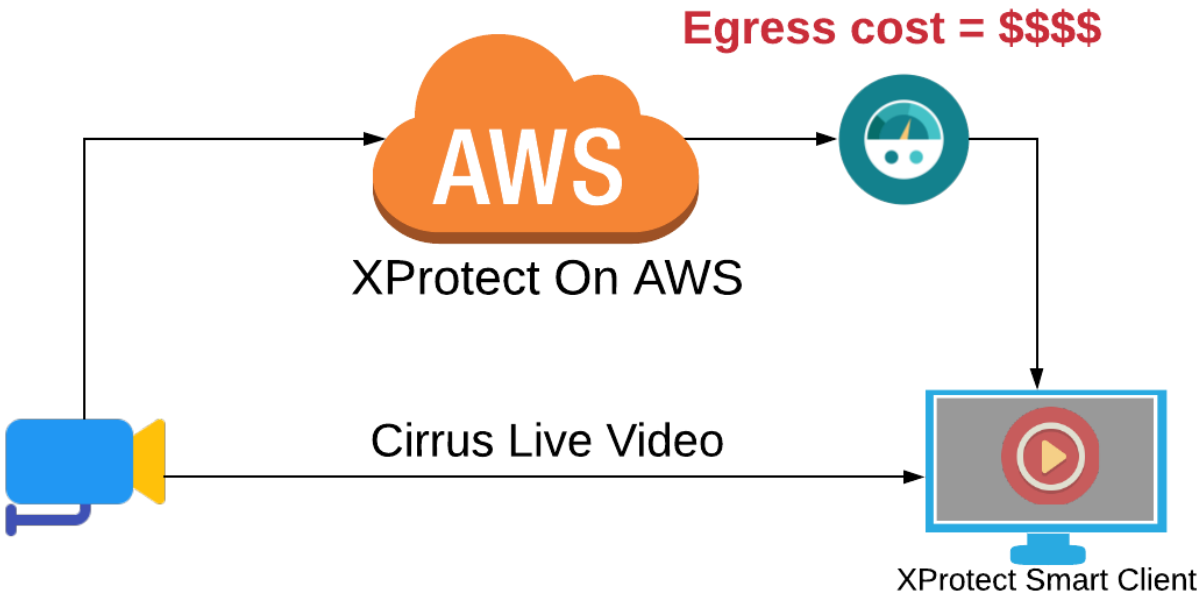
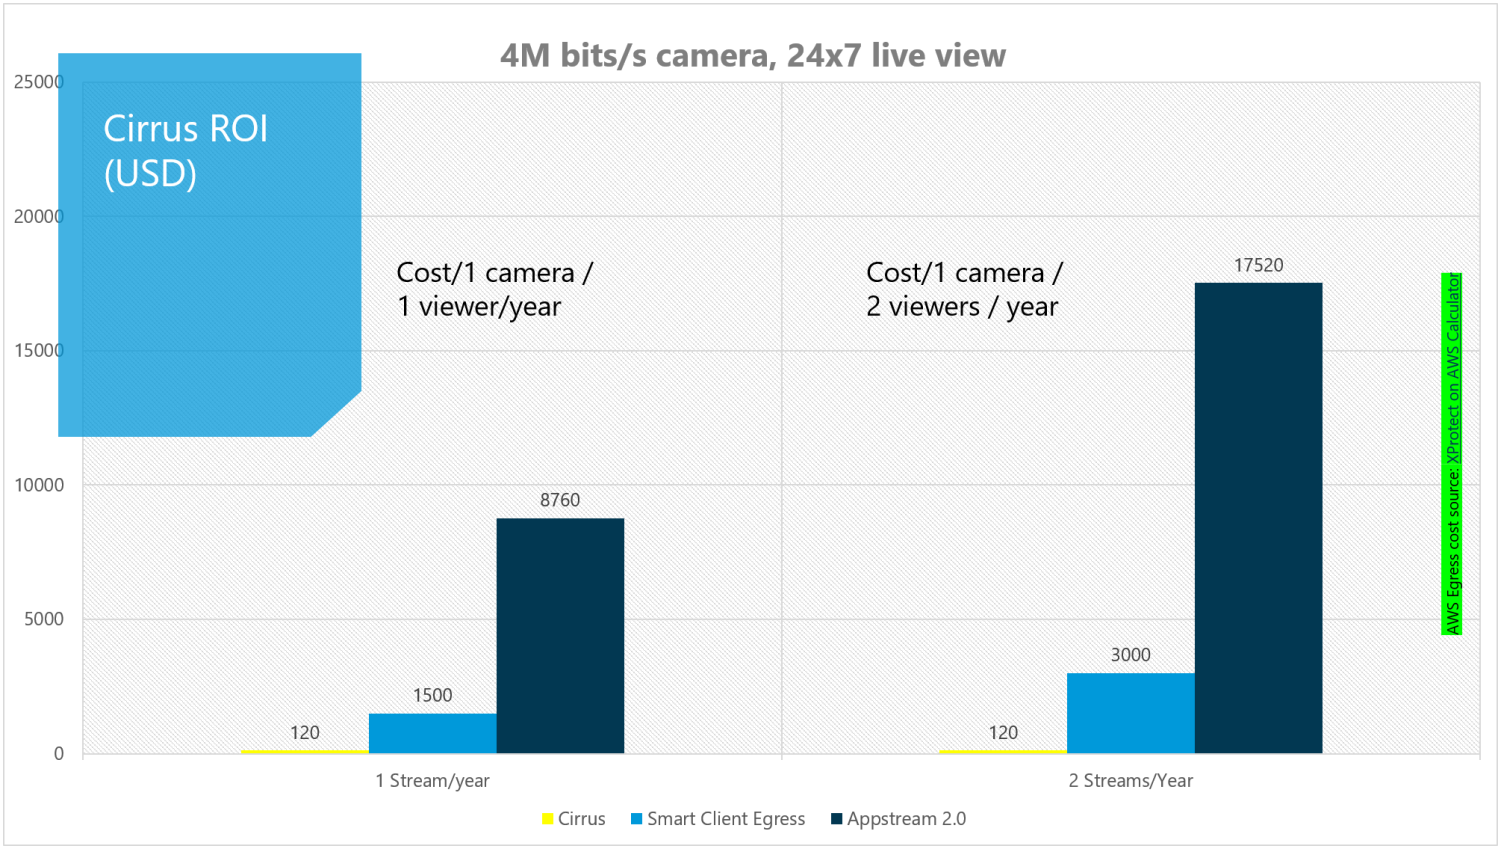
Overview

Cirrus provides a direct video pipe from cameras to the XProtect Smart Client. Thereby, it vaporizes high video egress costs when XProtect is deployed on public cloud infra.



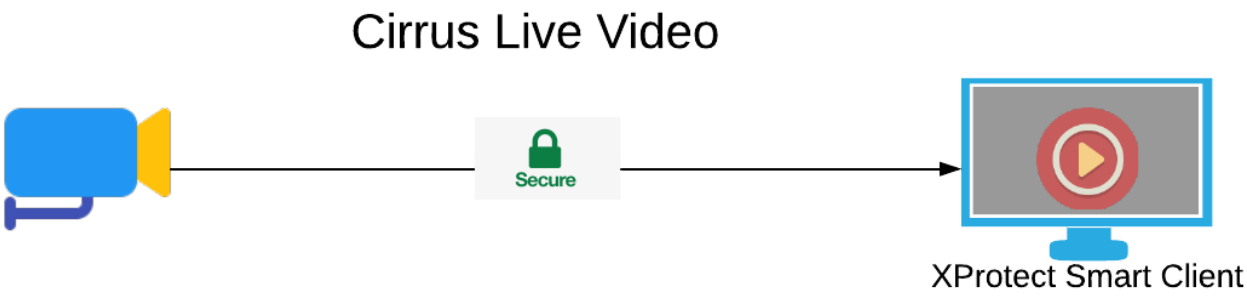
Tame the Egress Cost Beast

More than 10X Cost Savings/Viewer



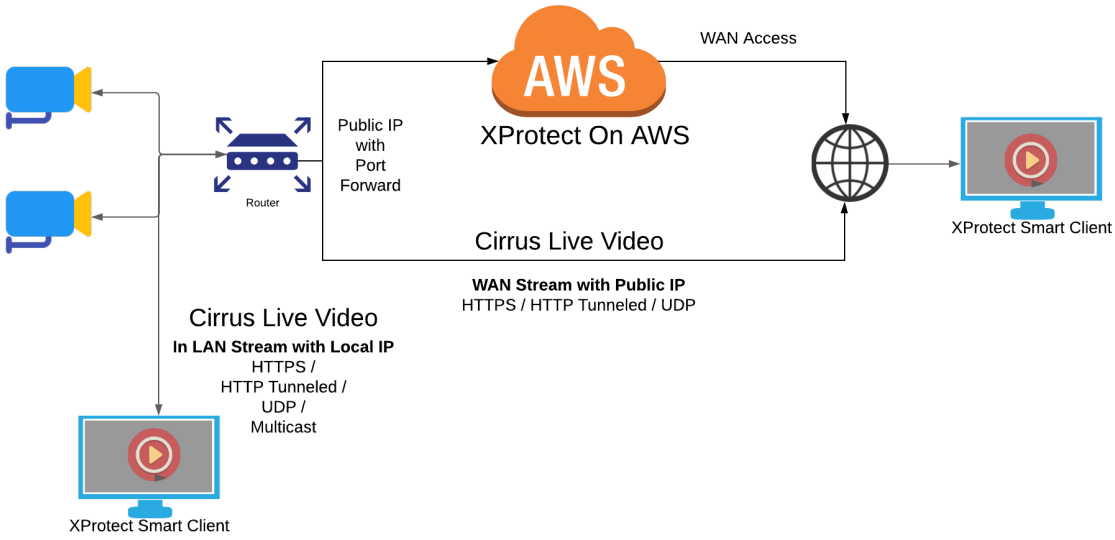
Security

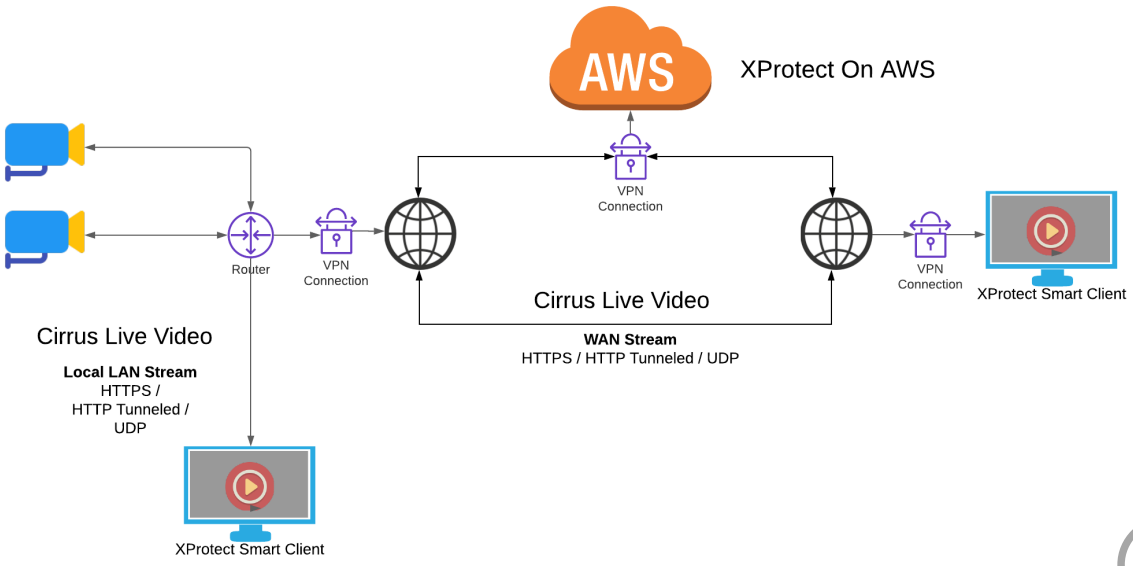
Encrypted streams from cameras that support HTTPS/TLS1.2.



Multi-Architecture Support

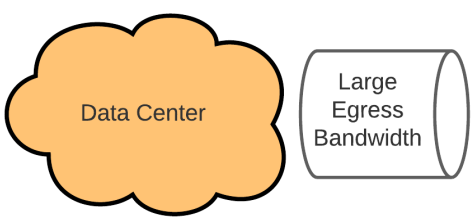
Support for a variety of deployment architectures and streaming choices



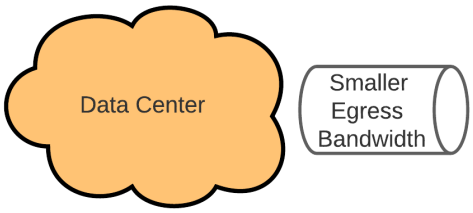


Egress bandwidth cost reduction for data centers

Direct live video streaming from cameras to clients, bypasses hosted private clouds, and reduces egress bandwidth needed by these. Saves costs/increases capacity.



No Cirrus



Yes Cirrus

Goodbye, video round trips

When cameras and clients are co-located, direct streaming avoids meaningless bandwidth-hogging video roundtrips.
